## **DETAILED ACTION**

# Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

## Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).

Application/Control Number: 10/055,611 Page 3

Art Unit: 2831

(j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 7, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luther et al. (6,305,850) in view of Tanaka et al. (5,862,280).

Luther et al. discloses (Figs 8-11) a ferrule comprising at least two alignment pin holes (see Fig. 9, the two holes on the lateral sides) into which alignment pins for positioning with respect to a mating ferrule are inserted, a plurality of fiber fixed holes (18) for inserting an optical fiber, the fiber fixed holes being formed at predetermined locations with respect to the two alignment pin holes, wherein each of the fiber fixed holes has at least a fiber guide portion (18a, fig. 11) for guiding the optical fiber, a fiber hole portion (18b) adjacent the fiber guide portion to

Application/Control Number: 10/055,611

Art Unit: 2831

receive the tip end of the optical fiber, and a fiber insertion portion (18c) adjacent the fiber guide portion to receive the sheathed portion of the optical fiber.

Luther et al. does not disclose the fiber guide portion (18a) and the fiber insertion portion (18c) being joined with a connection position having a tapered shape. Tanaka et al. discloses a ferrule comprising a fiber insertion portion (Fig. 5A) and a fiber guide portion, wherein the fiber guide portion and the fiber insertion portion are joined with a connection position having a tapered shape (4b). It would have been obvious to one skilled in the art to provide a tapered shape as taught by Tanaka et al. at the connection position between the fiber insertion portion and the fiber guide portion of Luther et al. to further prevent the optical fiber from breakage during the insertion of the optical fiber into the ferrule or during the use of the optical fiber connector and to further facilitating the work of insertion as taught by Tanaka et al. (col. 8, lines 19-23).

Re claims 8 and 10, Luther et al. discloses the fiber insertion portion of each fiber fixed hole being formed as a common fiber insertion portion for introducing a plurality of sheathed portions, the fiber insertion portion being provided with movement regulating means for regulating the movement of sheathed portion in the direction of arrangement of sheathed portion (Fig. 11), and an adhesive agent

pool for fixing the optical fiber being formed at the opening portion of the fiber insertion portion.

# Allowable Subject Matter

3. Claims 9, 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Cited Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hug et al., Knecht et al., Barnes et al., Suematsu et al., and Moriyama et al. discloses ferrules for optical fibers, comprising at least three portions for receiving the optical fiber.

### Communication

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chau N Nguyen whose telephone number is 308-0693. The examiner can normally be reached on Mon-Fri.

Art Unit: 2831

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on (703) 308 3682. The fax phone number for the organization where this application or proceeding is assigned is (703) 305 3432.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
